DETAILED ACTION

This is in response to applicant's remarks filed on 01/08/07.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Response to Amendment

Applicant's election with traverse of Group I, claims 1 and 2, drawn to unlabelled compounds of formula (I) in the reply filed on 01/08/07 is acknowledged. The traversal is on the ground(s) that claims 3-5 should be included in Group I because they are drawn to the same structure (formula) and such would not place a burden on the Examiner because a search of compounds of formula (I) would include claims 3-5. This is not found persuasive because as stated in the restriction requirement, labelled compounds are not included within scope of main claim 1. Radioisotopes such as

Art Unit: 1624

those of Tc, Xe or P are not included within the choices permitted at variables X, Y or Z or A or B. Thus, search for Group I vs. Group V is not co-extensive. Additionally, differing issues of patentability may arise based on the subject matter of Group I vs. labelled analogs present in Group V at the very least, the question of sufficiency of disclosure for scope of "radionuclide" being claimed.

Claim 1 and 2 (in part) and 3-13 are withdrawn from further consideration by the Examiner, 37 CFR 1.142(b), as being drawn to non-elected invention.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

"B" in formula (I) has not been defined in the claims. Additionally, "T" has two distinct definitions thus, rendering the claims indefinite.

U.S. Patent number 6,835,371 is cited to show the state of the art.
